

Rashaad Syed

London, UK | +44 7795 813996 | rsyed.mam2026@london.edu | [LinkedIn](#)

EDUCATION

London Business School, London, UK

Master's in Analytics and Management

2025 – 2026

GRE: 327

Vellore Institute of Technology, Amaravati, India

B.Tech, Computer Science & Engineering (Networking and Security)

2019 – 2023

GPA: 8.34/10.00

PROFESSIONAL EXPERIENCE

Harrods, London, UK

Student Consultant, London LAB

Mar – Jun 2026

- Ran discovery with commercial and finance leads to convert an unscoped demand-forecasting ask into a defined product opportunity, then shipped the MVP that turned 30M+ transaction records into category-level revenue forecasts
- Prioritised the build around one measurable outcome, pairing a forecasting pipeline with K-Means and behavioural-regime segmentation to replace recurring manual analysis with a self-serve view of high-value revenue
- Agreed success criteria with stakeholders up front and presented results as prioritised, decision-ready recommendations that senior leadership adopted into commercial and resource planning cycles

Perficient, Bangalore, India

Associate Technical Consultant

Jun 2023 – Oct 2024

- Owned delivery of production RAG assistants on Google Cloud and Azure, setting the latency and retrieval-quality bar that held 10,000+ daily queries at sub-2-second response and 99.9% uptime in production
- Scoped and launched a GraphRAG assistant after user research showed baseline retrieval failing on multi-hop questions, lifting answer accuracy 35% over the system it replaced for queries spanning structured sources
- Defined the agent-orchestration roadmap on LangGraph and Autogen, sequencing specialised research, validation and summarisation agents into a single workflow that cut analyst review time by 50%
- Shipped a HIPAA-compliant multi-agent healthcare assistant with role-based access control and automated PII masking, processing 5,000+ medical records with zero compliance findings across the regulated workflow
- Built the business case for invoice automation on Google Document AI, then led the rollout that removed 80%+ of manual data entry and returned 1,200+ staff hours a month to the finance operations team
- Translated stakeholder requirements into an XGBoost forecasting model over 120K+ records adopted by the client's pricing committee, and sized customer segments across 150K+ transactions to shape pricing and retention strategy

Code Facts, Hyderabad, India

Software Development Intern

Jan – May 2023

- Shipped RESTful APIs in C#/.NET Core on Azure that connected disparate systems into the scalable backend services behind client onboarding and customer communication workflows on the CRM platform
- Partnered with cross-functional teams to ship CRM features that streamlined client onboarding and internal communication, debugging cross-service integration defects in Git-based CI/CD workflows

VIT University, Amaravati, India

Research Assistant

Sep 2021 – Aug 2022

- Fine-tuned deep convolutional neural networks for cryo-electron tomography to 90% classification accuracy across 10K+ images, applying transfer learning and Explainable AI to improve robustness and interpretability

TECHNICAL SKILLS

AI & Data: LLM APIs, prompt and context engineering, advanced RAG, GraphRAG, hybrid search, vector databases (Pinecone, Weaviate, pgvector), AI agents (Autogen, ReAct, MCP, CrewAI, LangGraph, LangChain, LlamaIndex), evaluation and benchmarking, n8n, Make.com, Claude, Cursor, Azure OpenAI, scikit-learn, PyTorch, Pandas, Power BI, Tableau

Engineering: Python, Java, SQL, C#/.NET Core, JavaScript, RESTful APIs, full stack (MERN), SQL/NoSQL, ETL, Airflow, Kafka, systems and B2B integration, Google Cloud, AWS, Azure, Docker, Linux CLI, CI/CD, Git

Product & Delivery: product strategy and roadmapping, PRDs and technical specs, backlog prioritisation, discovery and user research, KPI definition, A/B testing, solution architecture, pre-sales demos and prototyping, go-to-market, Agile/Scrum, stakeholder management

ADDITIONAL INFORMATION

Ventures: Nexus (Co-Founder & Product Lead), built and shipped the MVP of an AI-powered student networking platform, designing matching and personalisation agents and owning the roadmap

Volunteering: Core Member, Rotary International, raised \$36K for Turkey & Syria disaster-relief efforts (2023)

Languages: Fluent in English, Telugu, Hindi and Urdu; Spanish (beginner)
